Canadian Data Report of Fisheries and Aquatic Sciences No. 658

Canada

Canadian Data Report of Fisheries and Aquatic Sciences

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1–25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26–160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

Rapport statistique canadien des sciences halieutiques et aquatiques

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

ABSTRACT

Ash, E.G.M., and M. F. O'Connell. 1987. Atlantic salmon fishery in Newfoundland and Labrador, commercial and recreational, 1984. Can. Data Rep. Fish. Aquat. Sci. 658: v + 294 p.

This report provides catch and effort data in the Atlantic salmon commercial and recreational fisheries in Newfoundland and Labrador in 1984. Data from the commercial fishery have been summarized weekly; catches are given by weight and by number for Statistical Sections, Areas, Management Areas, NAFO Unit Areas and Divisions, Newfoundland Region (insular), Newfoundland Region (Labrador), and Newfoundland Region (total). Historical, catch, effort, and mean weight data are also provided. Maps indicating the Sections, Areas and Management Areas into which Newfoundland Region is divided (Waldron 1974a) are provided. Catch and effort data collected from the recreational fishery are also summarized weekly; data are given by river, Statistical Section, Statistical Area, Gulf Region (Newfoundland portion), Newfoundland Region (insular), Newfoundland Region (Labrador), Newfoundland Region (total), Provincial Summary (insular), Provincial Summary (Labrador), Provincial Summary (total). Scheduled rivers are listed alphabetically and geographically and have been assigned map numbers for quick location on the maps provided. Historical data, 1953-84, are presented for insular Newfoundland, Labrador, and the province.

RÉSUMÉ

Ash, E.G.M., and M. F. O'Connell. 1987. Atlantic salmon fishery in Newfoundland and Labrador, commercial and recreational, 1984. Can. Data Rep. Fish. Aquat. Sci. 658: v + 294 p.

Le présent rapport fournit des données sur l'effort et les prises réalisées en 1984 dans le cadre des pêches commerciale et sportive du saumon de l'Atlantique à Terre-Neuve et au Labrador. Les données sur la pêche commerciale sont résumées pour chaque semaine et les captures sont présentées en fonction du poids et du nombre et selon le secteur et la région statistique, la zone de gestion, la zone-unité et la division de l'OPANO, et la Région de Terre-Neuve (île, Labrador et total). Un résumé à l'échelle provinciale (île, Labrador et total) est aussi présenté. Les rivières inscrites à l'annexe du règlement de pêche sont données par ordres alphabétique et géographique; les numéros qu'on leur a assignés permettent de les localiser facilement sur les cartes fournies. De plus, on présente des données historiques (1953-84) relatives à l'île de Terre Neuve, au Labrador et à toute la province.

Part 1 - Commercial Fishery

INTRODUCTION

This publication continues a series of reports providing catch and effort data from the Newfoundland and Labrador Atlantic salmon (Salmo salar L.) commercial fishery. Data for previous years are available in May and Lear (1971), Lear (1973), Waldron (1974b), Reddin and Waldron (1976), Reddin and Day (1980), Moores and Dawe (1980), Reddin and Short (1981), Short and Reddin (1981a, 1981b), Moores et al. (1984), Ash (1984) and Ash and O'Connell (1986). Compilation of these data form an integral part in updating the database required to assess and examine the status of insular Newfoundland and Labrador Atlantic salmon stocks.

METHODS

DATA COLLECTION

Data were obtained from three sources: sales slips, local sales estimates; commercial license data. Sales slips or purchase slips were supplied to fish buyers by Fisheries Statistics and Systems Branch, Department of Fisheries and Oceans and designed to include such information as daily catch (lb) by species and size, price per unit weight, fisherman's name, buyer's name, community where fish were landed and type of fishing gear used. In addition, buyers were asked when purchasing salmon to record the number and size of the salmon and state of processing in which they were purchased.

Local sales represent those salmon landings not recorded on purchase slips. These include salmon eaten by the fishermen, given away, or sold directly to consumers. For each community this quantity was estimated monthly by the local fisheries officers and submitted to Fisheries Statistics and Systems Branch on a supplementary purchase slip. Local sales were based on an average obtained from selected fishermen of each community. The accuracy and precision of this estimate are unknown and it may not include all salmon caught in non-salmon gear.

License data were obtained from the Resource Management Division, Licensing Section. These include number of fishermen as well as length (fathoms) and numbers of nets they were licensed to fish.

DATA PROCESSING

Data from Purchase Slips were computer filed by day and by community, then summarized by standardized weeks (Appendix 1) by community, Statistical Section, Statistical Area, Fisheries Management Area, NAFO Unit Area, NAFO Division, the insular Newfoundland portion of the Newfoundland Region, the Labrador portion of the Newfoundland Region, and the entire Newfoundland Region. Salmon catches were reported in different landed states of processing such as round, gutted head-on, or dressed gutted head-off fish. For consistency, all values were converted to round weights using conversion

factors established in 1953 (Reddin and Short 1980). The conversion factors were: (1) gutted, head on (x 1.1) to round weight; (2) dressed gutted, head off (x 1.2) to round weight. All catches recorded in pounds were converted to kilograms. Local sales were reported by month and by community and were proportioned over the month by day according to the daily percentage of monthly plant sales reported on purchase slips. Where local sales were reported for a particular month within which there were no daily catch data, they were divided by the number of days in the month. For the month of May, local sales were divided by 18, the number of days in which the fishing season was open. Weights and percentage of local sales by month appear at the bottom of each table in Appendices 2-7. They have been included in the catch statistics which are shown in the same tables.

In the tables of Appendices 2-7, the adjusted catch and estimated numbers were initially calculated at the community level and summed to the appropriate Statistical Section, Statistical Area, etc.

Landings were recorded in two size categories: small salmon (1SW - one-sea-winter), those less than 2.7 kg; large salmon (MSW - multi-sea-winter), those equal to or greater than 2.7 kg. Unfortunately, buyers often did not record size, usually when size did not affect market value. In these cases landings were recorded as unsized. Also, the proportions of large and small in local sales were not known and these were generally recorded as unsized. The unsized salmon were proportioned into large and small salmon (adjusted catch) by one of two methods. If the total weight of salmon reported as large and small in a week was equal to or greater than 10% of the unsized landings in that week, the unsized salmon were divided into large and small categories according to the proportions of large and small in the sized catch. Alternatively, if the total weight of sized salmon represented less than 10% of the unsized catch, predetermined default proportions of large and small salmon (based on the previous five year mean proportions) were applied to the unsized salmon to divide them into large and small categories.

Small and large mean weights by week were derived from sales slip data that included both weight and corresponding numbers of salmon. Calculations simply involved dividing the total weight by the numbers of salmon reported for each size category. Mean weights were calculated on a weekly basis at the community level, then the weights and numbers of salmon were totaled and redivided at the various other levels. Mean weights for the entire fishing season were calculated from total weight and numbers of fish, not by averaging weekly mean weights.

The estimated numbers of salmon in each size category were derived by dividing current catch data by either the calculated weekly mean weights or predetermined default weekly mean weights. The calculated weekly mean weights were used if in any given week the number of salmon in a size category (sample size) from which the mean weight was obtained was equal to or greater than 50 fish. Default mean weights were used to derive estimated numbers of salmon when the sample size was less than 50 fish in any given week. Default mean weights were the seasonal mean weights which were calculated for the Statistical Area in which the community is located, if the sample size over the entire season for that particular Area was equal to or exceeded 50 fish.

Otherwise, the mean weights from total insular Newfoundland catch data were used. All estimated numbers of salmon were obtained from the community catch statistics by week and then added to produce both weekly and seasonal numbers of fish for Statistical Sections, Statistical Areas, etc.

SUMMARY

The 1984 Atlantic Salmon commercial fishery in the Newfoundland Region yielded 699.2 metric tonnes, of this total 289.9 t were small and 409.3 t were large. The declining trend observed in recent years continued in 1984 (Table 2 and Fig. 4) and is reflected in both the small and large catches. In comparison to the previous five-year mean the 1984 total catch decreased by 45%. The amount of licensed gear used in 1984 decreased by 25% from the previous five-year mean (Table 3 and Fig. 4).

The total catch for the insular portion of the Newfoundland Region for 1984 was 482 metric tonnes (Table 2 and Fig. 5), a decline of 10% from 1983. This portion accounted for 69% of the total regional harvest by weight. Effort decreased by 21% from 1983 (Table 3 and Fig. 5). Labrador showed the greatest decline in catch (34%); this was the lowest catch on record (Table 2 and Fig. 6). Effort decreased by 17% from 1983 (Table 3 and Fig. 6).

Landings for each Statistical Area (1974-84) are presented in Table 2. The number of licensed commercial fishermen for each Statistical Area (1975-84) is shown in Table 4. Mean weights of salmon landed (1974-84) are presented by Statistical Area in Table 5. The estimated numbers of small and large salmon landed for the period 1974-84 are represented in Figure 7.

ACKNOWLEDGMENTS

For collecting the data, the authors acknowledge the staff of Fisheries Statistics and Systems Branch and Resource Management Division, Fisheries and Habitat Management Branch. Computer programs were developed by Eric Harvey and L. Feltham of Fisheries Statistics and Systems Branch. Neila Caines assisted with data tabulation and computation. Figures were prepared by Neil Hefford and typing by K. Harding.

Part 2 - Recreational Fishery

INTRODUCTION

This is the twelfth annual angling data report published since 1973 by the Freshwater and Anadromous Fish Division. It provides data on the catch and effort in the Atlantic salmon recreational fishery in Newfoundland and Labrador in 1984. Data for previous years are available in reports by Button and Wells (1974, 1975), Moores (1976), Moores et al. (1977, 1978), Moores and Tucker (1978, 1979, 1980, 1981), Moores and Ash (1984), Ash and Tucker (1984), and Ash and O'Connell (1986).

METHODS

The data were provided by the Resource Management Division, Fisheries and Habitat Management Branch, Department of Fisheries and Oceans, Newfoundland and Gulf Regions. Information provided includes observed and reported catch and effort data as well as estimates of unreported data. The observed and reported data were based on activities actually seen by river guardians or reported to him by others on the river during his surveillance. Estimated unreported data were based on fishing activity that occurred when the river was not patrolled, i.e. days of rest or while patrolling other areas. This was made in consideration of weather conditions, water levels, and the guardian's knowledge of the particular stock migratory pattern. The angling pressure and accessibility to the rivers have increased to such a degree during the last 10 - 15 years that observation and recording of total effort and angling catch have become virtually impossible. The estimated quantity on a weekly basis was incorporated into the angling data in 1974 to provide consistency in the reporting. In 1983, for greater accuracy, this practice was changed so that estimates were made on a daily basis.

This report also includes calculated catch-per-unit-effort (CPUE), defined as the number of fish angled per rod day (a rod day being a day or any part thereof in which an individual angles).

The data were summarized by river, Statistical Section, Statistical Area, insular Newfoundland, Labrador, and the province (Fig. 4 and 5). Rivers were tabulated according to their assigned seven-digit code (Waldron 1974) commencing at Cape Norman on the northern tip of the Great Northern Peninsula and proceeding consecutively and clockwise around insular Newfoundland and into Labrador. The seven-digit codes, developed for quick identification and location of rivers as well as for computer coding, denote not only the individual river numbers but also the Statistical Section (developed by Fisheries Systems and Statistics Branch in 1968) in which the mouth of the river is located. For example: Exploits River is coded 0707790. The number 07 indicates the Statistical Section and the 07790 is the individual river number. A given river can be easily located by using Fig. 1 and 2 in conjunction with the index provided in Appendix 10.

Catch and effort data were presented by week and include number of grilse (< 2.7 kg), number of salmon (> 2.7 kg), and percentage grilse. Also given is the number of days each week data were collected.

OPENING AND CLOSURE DATES

The season for Atlantic salmon angling in Newfoundland and Labrador as a whole extended from June 10 to September 15. However, because the timing of migration differs depending on the river, the opening and closing dates varied. Open season for all scheduled rivers during 1984 is listed in Table 1.

Scheduled salmon rivers may have to be closed periodically for reasons such as low water, research, enhancement, conservation, etc. Any such closings are listed in Table 2.

SUMMARY

In the 1984 Atlantic salmon recreational fishery in Newfoundland and Labrador, sports fishermen angled 27,151 salmon of which 26,779 were grilse and 372 were large salmon (Table 3 and Fig. 1). The overall catch increased by 9% over 1983. The catch of large salmon (372) was the lowest on record since 1953. This was the result of a new regulation which required fishermen in insular Newfoundland to release any salmon greater or equal to 63 cm in length. Rod days declined by 3% from 1983; CPUE increased over 1983 by 14%.

Rivers in insular Newfoundland yielded 24,878 fish or 92% of the total catch (Table 4 and Fig. 2). From the beginning of the season, fishermen were asked to voluntarily comply with the new catch and release regulation until it became official; however, some people chose not to and consequently 47 large salmon were recorded on the island. According to the previous five-year mean (24,426), 1984 was an average year. It should also be noted that during this past season some 40 rivers were closed to angling for varying periods due to low water levels (Table 2). The highest catch was recorded on the Humber River (2,912) (Appendix 2).

The catch of grilse in Labrador decreased by 18% from 1983; the catch of large salmon increased by 9% (Table 5 and Fig. 3). Effort in 1984 was relatively unchanged from 1983. The regulation for the release of large salmon was not in effect in Labrador and no rivers were closed during the season.

ACKNOWLEDGMENTS

We thank the field staff of Resource Management Division, Fisheries and Habitat Management Branch, for preparing the daily reports, Economics Branch for data collection, and Statistics and Computing Services for data processing, Neil Hefford for drafting, and K. Harding for typing.

Table 1. Periods of salmon angling for all scheduled rivers in Newfoundland and Labrador for 1984.

Waters	Period
Newfoundland	
Conne River and tributaries	June 10-Aug. 31
Garnish River and tributaries	June 10-Aug. 31
Humber River and tributaries	June 10-Aug. 31
Ten Mile Lake (St. Genevieve River System)	June 20-Aug. 31
Flat By Brook and tributaries	June 20-July 20
Little Codroy River and tributaries	July 1-Aug. 15
Little Barachois Brook and tributaries	July 1-Aug. 15
Fox Island River and tributaries	July 1-Aug. 15
Harry's River and tributaries	July 1-Aug. 15
Fox Island River	July 1-July 15
Watson's Brook: Will open June 20 with a fixed quota of 75 salmon, will close when quota is taken or on Aug. 31 if quota is not taken earlier.	
Torrent River and tributaries: Will be opened once it has been determined that enough salmon have passed upstream through the fishway to ensure adequate spawning escapement: will close Aug. 31.	
Highlands River	No open season
Cook's Brook	
Hughes Brook	
Parkers Brook (Pistolet Bay)	
Tides Brook (Mortier Bay) and tributaries	
Colinet River	
All other scheduled salmon rivers	June 20-Aug. 31
Labrador	
Forteau River	June 10-Sept. 15
Pinware River	June 10-Sept. 15
All others	June 20-Sept. 15

Table 2. Closures of scheduled rivers during the angling season 1984.

River	
Big Brook, Little Catalina	- No open season for that section 25 m upstream and 25 m downstream measured from the centre line of the bridge that crosses Big Brook in Little Catalina.
Branch River, St. Mary's Bay	- Closed July 16-Aug. 21 - upstream from causeway.
Northeast River, Placentia	- Closed July 16-Aug. 21 - from mouth to Fitzgeralds Pond.
Conne River	- Closed July 16-Aug. 21 - Bernards Brook and Twillick Brook tributaries of Conne River.
Biscay Bay River	- Clsoed July 19-Aug. 21 - entire river.
North Harbour River, St. Mary's Bay	- Closed July 19-Aug. 21 - from its mouth upstream to the bridge on the Placentia Highway.
Little Salmonier River, St. Mary's Bay	- Closed July 19-Aug. 21 - entire river.
Big Barachois Brook, St. Mary's Bay	- Closed July 19-Aug. 21 - entire river.
Gander River	- closed July 25-Aug. 21 - Salmon Brook tributary.
Exploits River	- closed July 25-Aug. 21 - Stoney Brook tributary. Main stem from steel bridge at Grand Falls upstream to fishway at Grand Falls.
Middle Arm Brook	- Closed July 25-Aug. 22 - entire river.
Wild Cove Brook, White Bay	- Closed July 25-Aug. 22 - entire river.
Burlington River	- Closed July 25-Aug. 21 - entire river.

Table 2 (cont'd)

River	
South Brook (including Gull Pd. Bk.)	- Closed July 25-Aug. 21 - entire river.
Tommy's Arm River	- Closed July 25-Aug. 21 - main stem and all tributaries.
Southern Arm Brook, White Bay	- Closed July 26-Aug. 21 - entire river.
Woodstock River	- Closed July 26-Aug. 22 - entire river.
Baie Verte River	- Closed July 26-Aug. 21 - main stem and all tributaries.
West River	- Closed July 26-Aug. 21 - Barney Brook tributary.
Northwest Arm Brook	- Closed July 26-Aug. 21 - entire river.
Peter's River, Bay of Exploits	- Closed July 26-Aug. 21 - entire river.
Charles Brook	- Closed July 26-Aug. 21 - entire river.
Salmon Cove River, Port Rexton	- Closed July 30-Aug. 21 - entire river.
Shoal Harbour River	- Closed July 30-Aug. 21 - entire river.
North West Brook, Indian Bay	- Closed July 30-Aug. 21 - entire river.
Big Brook, Little Catalina	- Closed July 30-Aug. 21 - entire river.
Trouty River, Trinity	- Closed July 30-Aug. 21 - entire river.
Campbellton River	- Closed Aug. 2-Aug. 21 - entire river including Neyles Brook and Indian Arm Brook tributaries.

Table 2 (cont'd)

River	
Gander River	- Closed Aug. 2-21 - from bridge at Glenwood upstream to headwaters. Closed Aug. 2-14 - northwest and southwest Gander.
Northern Arm River, Bay of Exploits	- Closed Aug. 2-21 - entire river.
Western Arm River	- Closed Aug. 2-21 - entire river.
Traverse Brook	- Closed Aug. 2-14 - entire river.
Gambo River	- Closed Aug. 2-14 - Triton Brook and Parsons Brook tributaries of the Gambo River.
Middle Brook	- Closed Aug. 8-14 - entire river.
Southwest Bk., Port Blandford	- Closed Aug. 8-21 - entire river.
North Arm River, St. Mary's Bay	- Closed Aug. 8-21 - entire river.
Big Barachois River, St. Mary's Bay	- Closed Aug. 8-21 - entire river.
West Brook, Halls Bay	- Closed Aug. 8-21 - entire river.
Indian River, Springdale	- Closed Aug. 8-22 - entire river.
Great Rattling Brook, Bay of Exploits	- Closed Aug. 8-21 - entire river.
Sop's Arm River, White Bay	- Closed Aug. 14-22 - entire river.
Coney Arm River, White Bay	- Closed Aug. 14-22 - entire river.
Doy Bay River, Horwood, N.D.B.	- Closed Aug. 14-21 - entire river.
Gulf Region	
Grand Codroy	- Closed June 25-July 2 - entire river.
Grand Codroy River - South Branch	- No open season - Trans Canada Highway to Source.

Table 2 (cont'd)

River	
Grand Codroy River - North Branch	- No open season - Mouth Crooked Brook to Falls.
Lomond River	- No open season - Fishway to Big Bonne Bay Pond.
Crabbes River	- No open season - 12 Mile Pool to Source.
Robinson's River	- No open season - Chatter Pool (Mile 16) to 25 yards above falls at Mile 19.
Fishels River	- No open season - Big Steady (Mile 10) to 25 yards above falls at Mile 18.
Little Barachois Brook	- No open season - Old Logger's School (Mile 19) to Source.
Southwest Brook (St. George's Bay)	- No open season - Second logging bridge from mouth (Mile 19 to Source).
Harry's River	- No open season - Mouth of Harry's River to below Sandbank Pool.
Spruce Brook	- No open season - Mouth of Spruce Brook to Source.
Pinch Gut Lake	- No open season - All tributaries of Pinch Gut Lake.
Humber Lake	- No open season - From a line drawn from Lundrigan's wharf to Wild Cove Point, upstream to Ballam Bridge.
Adies Lake	- No open season - All tributaries of Adies Lake.
Portland Creek (Southwest Feeder)	- No open season - From falls upstream from Fisheries cabin to Source.
Little Brook Ponds (Northern Peninsula)	- No open season - Mouth to first pond.

Table 2 (cont'd)

River	
West River	- No open season - Counting fence to 25 yards above falls.
Barachois Brook	- No open season - Mine Pool (Mile 14) to Source.

Table 3. Angled catch, effort and catch per unit effort of Atlantic salmon in Newfoundland and Labrador (Newfoundland Region), 1953-84. Five-year means and standard deviations are included.
